Customized motifs service
Hot fix transfer

ABOUT US

CSTAR is a leading provider of heat transfer products such as rhinestones, glitter, foil, and much more! With over 10 years of manufacturing experience, our company offers knowledgeable and competitive services to customers worldwide with our design team and our California based office.

We provide a range of services from custom design to final product. Our professional design team can recreate custom designs into a digital layout and quotation within 24 hours, with no set-up fees. Our custom minimum starts as low as 24 pieces per design for most materials. After layout approval, the final product will be delivered within 3-5 business days.

As a member of PPAI and ASI, we follow PPAI's Code of Conduct in our standards of safety, quality, and integrity. If necessary, we are happy to provide a copy of the code and/or U.S. CPSIA testing report. Our China facilities are open for inspections, and we warmly welcome you to visit!

CSTARINTL.COM

CSTAR

CSTAR has been in the heat transfer industry for over 10 years providing custom heat transfer products and services.

We are an approved vendor for several major companies like Universal Studios...with more than thousands of satisfied customers around the world.

FREE DESIGN

Our professional design team provides fast design services within 24 hours with no set-up fee.

FREE SAMPLE

A pre-selected sample set can be provided to you upon request.

FAST PROCESSING

After payment, most orders can be shipped out in 2-3 business days.

Easy 1-2-3 step process

Step 1

Submit artwork in any format

Step 2

Approve digital layout

Step 3

Confirm invoice and submit payment

FAST SHIPPING

3-5 day shipping through UPS, DHL, or FedEx.

CUSTOMERS

US office based in California available on call during normal business hours.

5A WASHING TEST

We have a industrial washing test equipment and can provide wash test per customer specifications.

NEW

CUSTOM TRANSFER
DIRECT TO FILM (DTF)

PRODUCTS

DIRECT TO FILM(DTF)

A great alternative to screen printing!

- ◆ Transfers are made using a new technology that prints images and designs on a specialized film material.
- ◆ Priced by design size instead of the number of colors so we can provide full color heat transfers with lower minimums compared to screen printing.

CUSTOM DECALS

Sticker decals for everyday things!

- ◆ Apply on any smooth surface such as paper, plastic, wood, glass, metal, and ceramics.
- ◆ Easy to apply and durable for daily use indoors and outdoors.
- ◆ Great for simple and complex designs like logos, gradients, patterns, quotes, etc.

How to apply:

- Make sure the smooth surface is clean and dry before application.
 - Slowly peel the white paper backing away and the sticker will stay adhered to the clear transfer tape.
 - Place the sticker on the surface and run a squeegee or credit card over it.
 - Peel the clear transfer tape away starting from the corner and discard. Enjoy!
- Note: Cannot be washed by dish-washing machine.**

Hot Fix Materials

RHINESTONE

We carry two types of rhinestones. Classic lead free is our most popular and economical choice. Low lead MC, or machine cut, rhinestones are shinier with more facets. We also carry resin rhinestones.

STUDS

Made out of aluminum, we offer rhinestuds, domestuds, and nailheads. These come in a wide selection of colors and shapes. These are lighter in weight and cost less than rhinestones.

PU

A classic vinyl material, soft to the touch with some stretch. Choose from styles such as flat, neon, glow-in-the-dark, iridescent, sand/brush, and the newest addition, pearl effect. We have more than 100 colors available.

FOIL

There are 2 types of foil: regular and stretchable. Regular has a mirror finish using a thicker material, while stretchable has a metallic finish in a thin, soft material. We have different patterns available like hologram, iridescent, brush, and transparent.

GLITTER

Glitter is another classic vinyl heat transfer. One of our most popular materials, it is often used in a glitter and rhinestone combination. We also have patterned glitter such as rainbow, camouflage, and animal print.

FLOCK

Soft fuzzy fabric with a 3D appearance. There are 3 types of flock: regular, medium, and long hair. The difference is the height and texture of the fuzziness.

Special Process

TEMPLATE MAKING

Templates are made for designs using rhinestones and studs. For every different size and color, a separate template must be made.

PRINTING TRANSFER SERIES

We can print designs and images on PU, foil, flock, fabric, and glitter. Recommended for very detailed designs with small lines or lettering. We can also add a 3D embossed effect on top. For more details, please see page 39-44.

SILICONE LABEL

Commonly used for brand labels, we have: flat, bump, hollow, toothbrush, and silicone film. These are waterproof and durable, so they are great for outdoor apparel, backpacks, and bags. For more information, please see page 49-50.

Classic Lead Free Rhinestone

- Our most popular and economical choice!
- Korean quality rhinestones made in China.
- Low lead content as required by U.S. CPSIA standards.
- Passes the standard Oeko-Tex test.

Cotton, Polyester, Cotton/Poly Blends.

Aluminum Studs Series

We offer 3 kinds of aluminum studs: rhinestuds, domestuds, and nailheads. Each type is available in a variety of colors and sizes, including neon colors! Nailheads also have a wide selection of shapes like stars, hearts, diamonds, and more.

RHINESTUD

Rhinestuds are faceted like rhinestones and have a metallic shine.

DOMESTUD

Like rhinestuds but without the facets, these are rounded with a smooth surface.

NAILHEAD

Flat instead of domed, these are available in 200 colors, including special colors like neon and matte. These also come in different shapes like crescent, stars, hearts, etc.

Hot Fix Rhinestud

- Made with aluminum and faceted like rhinestones but with a metallic shine.
- Lightweight and more economical compared to rhinestones.
- Made in Korea and contains no lead content as required by U.S. CPSIA standards.

Sequin Series

HOT FIX SEQUIN

Flat sequins spread out individually like rhinestones. Bright and shiny, our sequins come in a variety of colors. They are light-weight compared to rhinestones and nail-heads.

MOQ: 24 pieces

PRE STRUNG SEQUIN

The traditional sequin style with each sequin sewn together. Can be either sewn or heat pressed on.

MOQ: 200 pieces

(complex patterns needed to be requested separately)

REVERSIBLE FLIP SEQUIN

Reversible sequins that can be flipped up and down for a two-toned color style. These have a bottom layer for the glue backing and comes in one piece.

MOQ200 pieces

Hot Fix Sequin

- Flat round discs made with PET material in Korea.
- Smooth and lays flat on top of fabric.
- Choose from a variety of shiny foil-like colors!

Hot Fix Glitter

The most popular and classic heat transfer material for bling. Made in Korea, our glitter is flake-free, bright, and comes in a large variety of colors. Great by itself or in a combination!

DESIGNS WITH GLITTER

COMBINATION DESIGNS

Hot Fix Glitter

- One of our most popular heat transfer materials!
- Sparkly and colorful with a flake-free texture.
- Try using a glitter and rhinestone combination to make your design unique!

⚠ Not recommend as a bottom layer material.

Hot Fix TPU Glitter

TPU glitter is a softer, brighter glitter with finer flakes for a smooth feel. These come in pre-selected patterns like rainbow, camouflage, and animal print. We also offer 4 solid colors like gold for a premium look.

COMBINATION DESIGNS

Hot Fix TPU Glitter

- Soft, bright, patterned glitter that has a smoother finish compared to our classic glitter.
- Custom pattern available with higher MOQ.
- Material thickness: 0.21mm.
- Production time: 7-10 business days.

THERMOCHROMIC MATERIALS

Under normal circumstances, a temperature of 20 will cause color change.

THERMOCHROMIC MATERIALS

- A soft, thick PU material that changes color with heat.
- The 1mm thickness creates a 3D appearance similar to silicone.

140°C-170°C or 285°F-340°F

10S-15S

Peel warm

Hot Fix Foil

Shiny with a mirror finish, our foil comes in 14 colors including hologram and iridescent. We have 4 pre-selected printing patterns for a unique look. Custom design patterns are also available with a higher MOQ. (Please note that these patterns can only be printed with special machinery.)

IRIDESCENT FOIL (CDH-15 & CDH-17)

- A pearl-like shine that shifts colors at different viewing angles.
- **Note: CDH-15 End effect depends on the color of the material being pressed on.** Over light backgrounds, iridescent foil has light pink, blue, and yellow tones. Over dark backgrounds, it has a blue and green color effect.

PRINTING FOIL

- A thicker foil material that allows for designs and patterns to be printed on top of it.
- Available in solid and hologram colors (CDH-15 & CDH-17 can't be printed on top).
- We also offer 4 patterns that can be customized into the shape of the design for a more flexible feel.

COMBINATION DESIGNS

Foils can be combined with our other heat transfer materials.

Hot Fix Foil

⚠️ Not recommend as a bottom layer material.

IDEAL FOR FABRICS

Cotton, Polyester, Cotton/Poly Blends.

⚠️ Not recommend for design with bold and large pieces of material details

Stretchable Foil

The thinnest heat transfer vinyl in our collection at only 0.08mm thick. Smooth and soft to the touch with stretchability and does not crease like regular foil. It has the most colors to choose from including colors like iridescent and translucent.

REGULAR STRETCHABLE FOIL

- A metallic or chrome-like shine, this foil has a soft, smooth feel while being able to stretch.
- Can be more detailed compared to glitter.

TRANSLUCENCE STRETCHABLE FOIL

- Translucent with 3 different patterns available (C08, C09, C10).
- After application, the color of the fabric being pressed on will be visible under the design.
- Overlap on the printable fabric adds 3D effect to the design.

COMBINATION DESIGNS

Can be combined with other heat transfer materials.

Stretchable Foil

NOTE: Stretchable foil can be pressed more than once. If needed, after the first press, please remove the protective film and put a craft paper on top, use temperature not to exceed to 265 F to press a second time. Please note STF-17 & STF-18 pressing temperature should not exceed to 265 F.

other optional foil with textures

Hot Fix PU

There are 5 types of PU vinyl: regular, glow-in-the-dark, reflective, brush, and sand PU.

Soft, thin, and eco-friendly polyurethane made in Korea.

Can be cut into 1mm thin lines for greater details.

REGULAR PU

- The most popular PU choice. We offer matte, neon, and pearl-luster colors.
- We have a large selection of colors to choose from including 7 neon colors.
- Pearl-luster is the newest addition to the market!
- Try a combination of neon PU and reflective for an extra eye-catching design!

GLOW-IN-THE-DARK

- We have two types of glow-in-the-dark, regular and iridescent.
- Regular has a matte finish and will absorb light for the glow effect in the dark. Choose from 7 different colors.
- Iridescent has 4 eye-catching colors to choose from. It provides an iridescent effect in the daylight and a glow effect in the dark.

Hot Fix PU

BRUSH & SAND PU

A thin, soft PU material with a very subtle sparkle effect. Brush PU has soft lines like a brushstroke, and sand PU has a soft sand-like appearance.

REFLECTIVE PU

- Reflects light at different angles.
- Choose from the classic silver, rainbow, or rainbow patterned colors. These rainbow ones appear dark but shows a rainbow pattern color when light hits it from different directions.

COMBINATION DESIGNS

Great for team names, numbers, and logos. Can be combined with other materials. Try a combination of neon PU and silver reflective PU!

IDEAL FOR FABRICS

Cotton, Polyester, Cotton/Poly Blends.

Hot Fix Fabric C

Select from deerskin or imitated leather fabrics. Deerskin is a suede texture and imitated leather has the appearance and feel of leather.
Great for creating a textured appearance with a 3D feel.

COMBINATION DESIGNS

Fabric C can be used together with other materials, like rhinestones and studs. It can also be used as a layering material.

Cotton, Polyester, Cotton/Poly Blends.

Heat Transfer Print

A GREAT ALTERNATIVE TO SCREEN PRINTING

Transfers are made using a new technology that prints images and designs on a specialized film material.

We offer 4 different types of transfer print: regular, glitter, 3D, and reflective.

REGULAR TRANSFER PRINT

A basic essential, the regular print is great for detailed and complex designs that have over 4 colors. Gradient colors can also be done.

GLITTER TRANSFER PRINT

Glitter appearance with smooth surface. It's usually done in one or two colors.

COMBINATION DESIGNS

Combine with rhinestones, glitter, foil and etc, on one sheet.

⌚ Normal production time is 10-15 business days.

Heat Transfer Print

3D TRANSFER PRINT

Silicone material for a raised 3D effect.

REFLECTIVE TRANSFER PRINT

Reflects when light shines upon it at different angles.

INSTRUCTIONS

Printing PU

THE NEW TYPE OF DIGITAL PRINTING WITH LOW MINIMUM

A new digital printable PU material made in Korea. It is the thinnest material out of all the printing materials we carry. The ink is eco-friendly and suitable for all types of fabrics. There are three types of printing PU: regular, reflective, and emboss printing PU.

COMBINATION DESIGNS

Can be combined with many other materials but cannot be the bottom layer.

Printing PU

REGULAR PRINTING PU

Colors can be matched to custom designs. Priced by size rather than number of colors so designs can have many colors with no upcharge.

REFLECTIVE PRINTING PU

Printing PU but with a reflective surface. It appears black during the day and can be illuminated by light when dark.

EMBOSSS PRINTING PU

Printing PU with 3D lines added on top to create a textured appearance and feel.

INSTRUCTIONS

 160-180°C or 320-355°F

Super Soft Printable Flock

Softer and better hand feel compared to regular flock.
Customize detailed and colorful designs to be printed as flock.
Combine with other materials or use as a bottom layer.

COMBINATION DESIGNS

Can be combined with most of our current materials, including being used as a layering material.

Other Printable Fabrics

Choose from different textured base fabrics: satin, twill, and coarse texture.

Other materials like rhinestones and vinyl can be layered on top of these printing fabrics for a unique 3D effect.

Printable Gold & Silver Stretchable Foil

- Print complicated multi-colored designs with a metallic effect.
- Choose from either gold or silver as the foundation material to be printed on.
- Thinner with more stretch than normal film material.
- Eco-friendly material and printing process!
- We can also create a slight raised effect by using ink UV printing.

COMBINATION DESIGNS

This printing technique can be combined with different materials.

NOTES: When choosing gold or silver as the foundation color, the final design color will be different than the original design due to the influence of the foundation color as seen below:

Printable Glitter

- Print your design with a glitter layer on top and like our regular glitter, the flakes will not come off. This allows for more detailed designs that you can't get with classic glitter vinyl.
- Designs of the same size are the same price regardless of the number of colors.
- Try using printable glitter in a combination with rhinestones, regular glitter, and more!

COMBINATION DESIGNS

Embroidery Patch

- A classic apparel decoration often used for hats, jackets, denim, and polos.
- Our most popular products are chenille and the combinations of using twill and embroidery, and rhinestones and embroidery.
- We can also incorporate other materials such as pearls and sequins.

① MOQ 24 pieces, except the Chenille Embroidery MOQ 200 pieces.

INSTRUCTIONS

🔥 160-180°C or 320-355°F 🚶 Medium pressure ⌚ 8S-12S

COMBINATION DESIGNS

Special Patch

- Patches made using heat transfer materials. A fabric is used as the bottom layer with any material in our catalog on top.
- Choose the type of backing: iron on glue, sticker, or Velcro.

COMBINATION DESIGNS

① MOQ 24 pieces, except the printed patches MOQ 50 pieces.

Silicone Transfer

- We offer 5 different kinds of silicone transfers: flat, bump, hollow, toothbrush, and silicone roll.
- Each type has a selection of 5 colors, and can either be made as a heat transfer or as a sewn on.
- Skin-friendly and eco-friendly, these are great for sportswear, outdoor clothing, hats, and bags.

FLAT SILICONE

- Perfect for small logos and labels on sportswear and hats!
- We offer two different thicknesses: 0.5 mm and 0.8 mm.
- Choose transparent or non-transparent for the bottom layer.

BUMP SILICONE

A silicone label with two levels, a base layer and a raised layer. The bottom thickness is 0.5 mm with an overall thickness of 0.8 mm.

HOLLOW SILICONE

We offer two different thicknesses: 0.5mm and 0.8mm. Custom thickness available upon request.

Silicone Craft Series

TOOTH BRUSH SILICONE

A silicone base layer with soft silicone bristles on top for a unique touch texture.

SILICONE ROLL

A thin silicone material with three thicknesses: 0.2mm, 0.3mm, and 0.5mm. Great for making lettering or lines with a more subtle 3D style.

CUSTOM-SEWN SILICONE LOGOS

Any of the listed silicone series material with an added bottom layer to create an edge that allows for sewing.
